We have been informed by our supplier V-TAC that they have identified a potential problem with the power wires not being thick enough to withstand a lightning surge of 3000V. This potential problem affects the following batch code only: **0000603**. The batch code can be found on the power supply as shown below:

If you have one or more V-TAC LED Panel Lights with the matching batch and part code, please contact CPC and a replacement product will be arranged for you.

#### **How to Proceed**

1. **Please remove the item from use** – If the batch code matches your product please disconnect the LED Panel Light and remove the power supply too. Once this has been done please contact us for the replacement LED Panel Light. Should you have any questions please email us at [webadmin@cpc.co.uk](mailto:webadmin@cpc.co.uk) or call our contact centre on **03447 88 00 88** and quote the reference **“V-Tac Panel light recall”** for expert technical advice on how to proceed.
2. Once removed, please do not use the light or the power supply to avoid further problems.
3. Please email us at [webadmin@cpc.co.uk](mailto:webadmin@cpc.co.uk) or call our contact centre on **03447 88 00 88** and quote the reference **“V-Tac Panel light recall”** to arrange the exchange of the LED Panel Light
4. **Full support and advice** – if you have any concerns relating to this product, please email us at [webadmin@cpc.co.uk](mailto:webadmin@cpc.co.uk) or call our contact centre on **03447 88 00 88** and quote the reference **“V-Tac Panel light recall”** - we're here to help.

Please accept our apologies if you have already disposed of your faulty item. We look forward to doing business with you in the near future.

Yours sincerely,

Angela Payne  
Contact Centre Manager
